

Trees and Shoreline Naturalization Bundles at Discount Prices

The Haliburton Highlands Stewardship Council is again this year offering you the chance to purchase trees and shoreline shrubs for your Haliburton County property.

Not only will you be able to get these at discounted prices but when you pick them up next spring you can attend a free course on how to plan your project and how to plant the trees and shrubs.

The Stewardship Council's coordinator is also available to answer your questions on what to order for your property.

If you want to take advantage of this offer you need to act now as orders need to be placed before the end of November

We request orders now so we can work with nurseries to ensure stock availability when plants arrive this coming spring.

The application is attached and all details about the program are available on the application; please feel free to submit your application electronically by email or mail it in to the address below – don't forget your site photos!

Why plant shoreline shrubs along part or all of your shoreline. Here is the Coles Notes answer.

- Every septic system on your lake leaches nutrients into your lake – nutrients such as phosphorous and nitrogen that pollute your lake, increase weed growth and remove oxygen that fish need.
- The plants in a shoreline bundle are designed to absorb these nutrients before they can reach and pollute your lake

Talk to your neighbours that have naturalized part of their shoreline. Generally they will tell you that after some initial reservations they love the increased presence of butterflies, hummingbirds and other wildlife. They also love the fact that they are protecting the lake for their kids and grand kids.

COUNCIL

“Promoting and supporting the wise stewardship of
natural resources in the Haliburton Highlands”

Spring 2012 TREE AND SHRUB PLANTING PROGRAM

The Haliburton Highlands Stewardship Council is pleased to offer a native tree and shrub planting program to support private land stewardship. Trees and shrubs are made available each spring to landowners and community organizations in Haliburton County on a “*first-come, first served*” basis. All orders must be PICKED UP at the time and location to be specified and will be subject to 13% sales taxes. Prices and species availability are subject to change and additional cold storage and transportation costs will apply.

To ensure we can fulfill your order please submit your application in the Fall of 2011!

Because these seedlings are bare-root, they need to be planted **right away** if they are to survive, which is why it is important to have a plan in place before-hand. If you have great planting ambitions, it is strongly recommended that you enlist the services of a Forestry Consultant in order to prepare a planting plan and attend a tree planting workshop.

COST:

Coniferous Trees	Price / Tree	Shrub Mixtures	Price / Bundle
White Pine (Pw)	\$0.55	Shoreline Bundle: Alternate and Red-Osier Dogwood, American Elderberry, Nannyberry, American High-bush Cranberry Upland Bundle: Sumac, Hawthorne, Black Chokecherry, June- berry, Service Berry, Pin-cherry	25 plants per bundle Mixture of Species listed \$25.00 for Shoreline, \$30.00 for Upland
Red Pine (Pr)	\$0.55		
White Cedar (Ce)	\$0.69		
White Spruce (Sw)	\$0.55		
Hemlock (He)	\$0.65		
Red Spruce (Sr)	\$0.69		
Tamarack/Larch (La)	\$0.98		
Deciduous Trees	Price / Tree		
Red Oak (Or)	\$0.80		
Hard Maple (Mh)	\$0.95		
Black Cherry (Cb)	\$1.00		
White Ash (Aw)	\$0.85		

Other Conditions and Criteria:

- The plants must not be resold or used for landscaping purposes. Plants should be used for the intended purpose at the site specified in the application. Plants can be used to rehabilitate open or harvested areas, to control erosion, create a windbreak or buffer, naturalize a shoreline, or create wildlife habitat.
- All applications must be accompanied by a photo of the site to be planted (digital preferred).
- Site preparation may be required by the landowner. There should be a reasonable expectation that properly planted trees will survive.
- Recipients should make a reasonable effort to control weeds or other competing species around the young plants, and provide adequate watering in the event of summer drought conditions, to help the plants get established.
- Landowners agree to allow Stewardship Council representative to visit their property for the purpose of assessing tree survival. Landowners will be contacted in advance to verify timing.

Additional Information:

Only plants native to Ontario and in the appropriate seed zone are supplied through this program. All orders include a series of fact sheet on handling, planting and tending techniques, pest control, species selection, and a variety of other related topics. Applications for spring 2012 are accepted throughout summer 2011 *while quantities last* up until Jan 15th, 2012, and are usually distributed the first weekend in May, 2012. *If you have missed the deadline, please contact the stewardship council immediately for remaining stock availability*

(Use this chart to complete the form on the back of this sheet. It is important that you select the appropriate species for your planting site.)

Species	Best growing Conditions								
	Soil*			Moisture			Light Exposure		
	Sand	Loam	Clay	Dry	Moist	Wet	Full Sun	Pt.Shade	Shade
Wh. Pine	X	X			X		X	X	
Red Pine	X	X	X	X	X		X		
Wh. Cedar	X	X	X		X	X	X	X	
Wh. Spruce	X	X	X	X	X	X	X	X	
Hemlock	X	X			X	X	X	X	X
Rd Spruce	X	X			X			X	X
Red Oak	X	X	X	X	X	X	X		
H. Maple		X			X			X	X
Blk Cherry	X	X			X		X		
Wh. Ash	X	X			X		X		

For more information, please contact the Haliburton Highlands Stewardship Coordinator at 705-286-5206.

*Sand, if squeezed together, will fall apart. Loam, if squeezed together, will form loose clumps. Clay, if squeezed together, will stay together.

Spring 2012 TREE AND SHRUB PLANTING PROGRAM ORDER FORM

Complete this form and return it to the Stewardship Council office. Applications are reviewed by an Approval Committee in March, at which time confirmation notices are sent to qualified landowners. Orders will be available for pickup in May from a designated location (TBD), and **must be paid for in full before** the plants are picked up from the storage facility.
